

REMARKS

The Examiner objected to the Drawings for failing to show process steps for the entire claimed method including the SO₃. The Examiner's suggested changes have been made. With respect to the drawings, the Applicant has amended FIG. 1A to show that the sub-stoichiometric stage is a SO₃ reducing environment; that SO₃ levels are maintained in the excess air stage; time period; and prior to selective catalytic reduction. Applicant has amended FIG. 1B to show that the micro-stage is a SO₃ reducing environment.

Respectfully submitted,
